

# LTN Schedule Changelog

## Schedule 7.1.12 - 7.1.14 Changelog

Type	Component	Details (for Customers)
Bugfix	Youtube authentication	Added additional checks for some edge-cases
New	Transcoding	FPS value can now be provided in a floating point format. System will only use the first two decimal places, using . as the decimal separator (e.g. 29.97, 30.00)
Change	Playout output	Added additional encoding flags to make MPEG-TS outputs more industry compatible.
Bugfix	Settings	System prevented the UI from changing settings that may only be changed by the server.
Bugfix	Playlist	Fixed an issue where looped sub-playlists were not properly reset, which could cause a problem when the last sub-item had trim points set.
